# Tutorial 6 (to complete in week6)
# More SQL

## Tutorial Objectives:

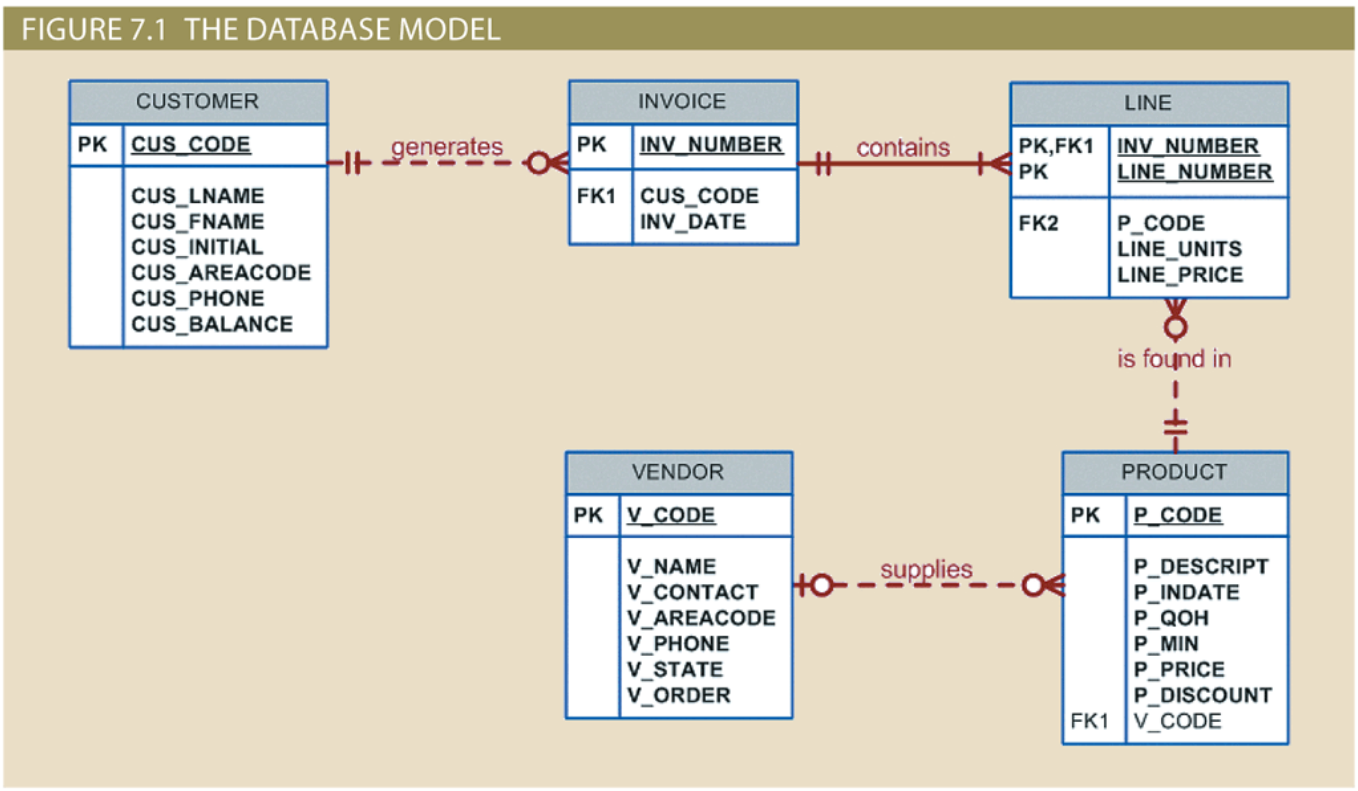

- **To continue learning SQL (DML)**

## Tutorial Tasks:

### Task1

Run the code from the script file Ch07SaleCo.sql provided on Stream to create and populate the following five tables (CUSTOMER, INVOICE, LINE, PRODUCT, VENDOR).

FIGURE 7.1 THE DATABASE MODEL

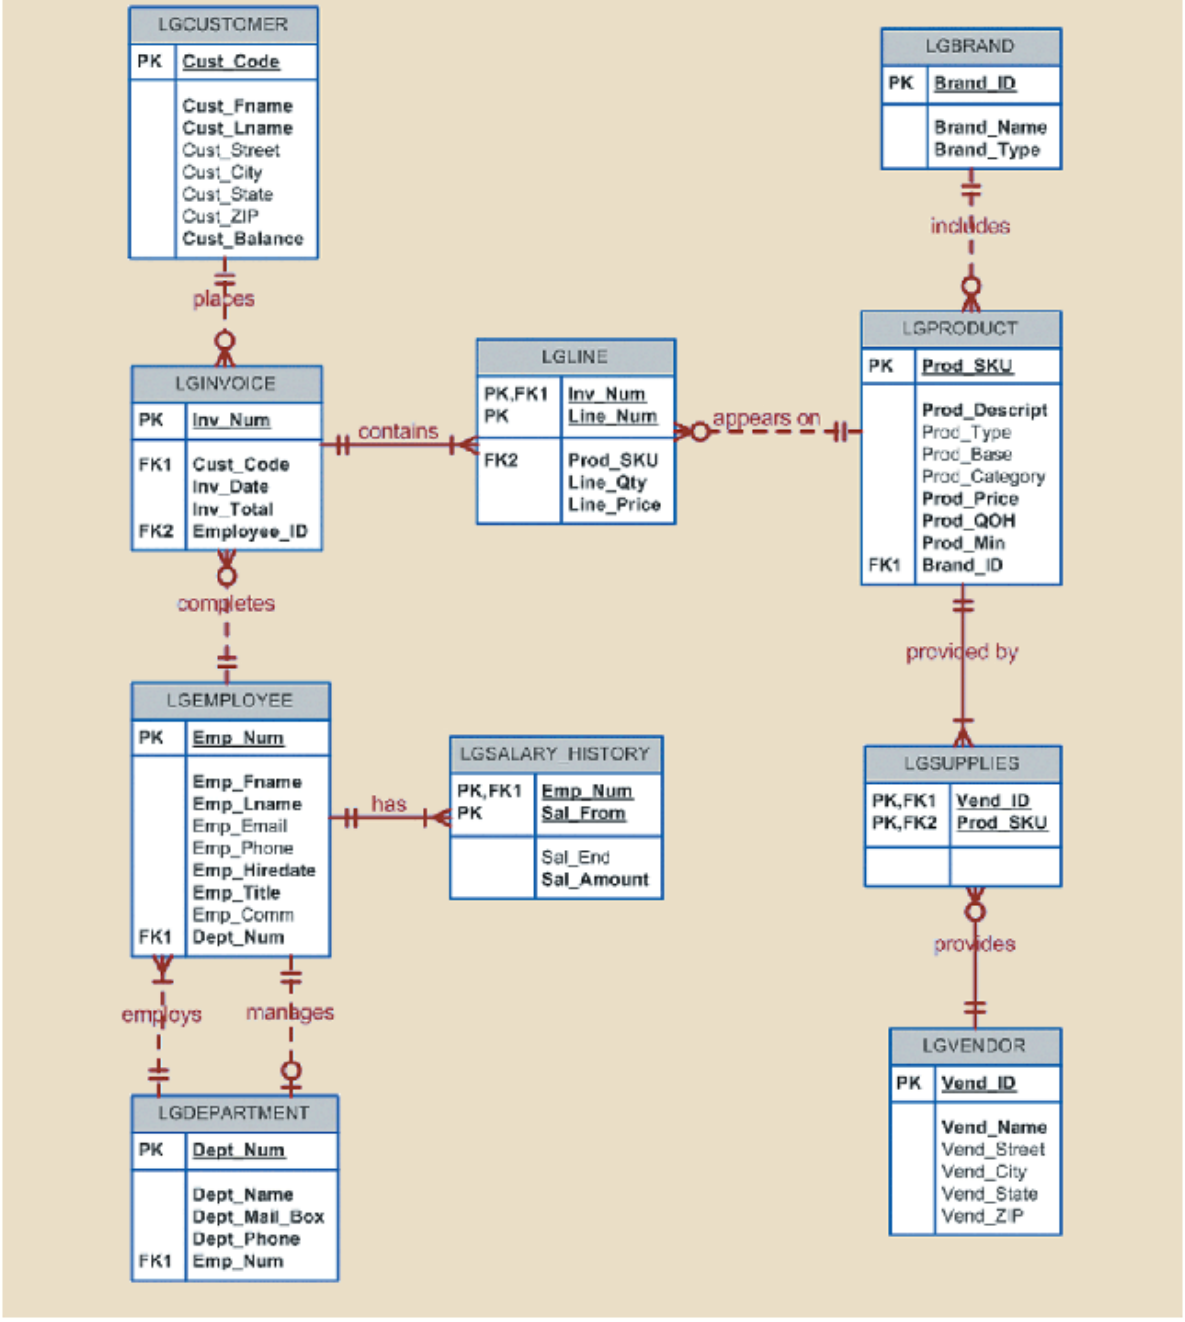

- Do the review questions 9-26 (pg. 325-330) provided at the end of chapter 7.
- Modify some of the query results (for formatting purposes) based on the Notes given at the end of Tutorial 5.

## Task2 (Some more suggested SQL queries for practice)

Run the code from the script file Ch07LargeCo.sql to create and populate the following 10 tables (LGCUSTOMER, LGINVOICE, LGLINE, LGPRODUCT, LGBRAND, LGSUPPLIES, LGSALARY_HISTORY, LGEMPLOYEE, LGDEPARTMENT, LGVENDOR).

FIGURE P7.27 THE CH07_LARGECO ERD

- Do the review questions 27-44 (pg. 331-337) provided at the end of chapter 7.
- Modify some of the query results (for formatting purposes) based on the Notes given at the end of Tutorial 5.
