158.337 S2, 2023 - Tests and Assignment Schedule Details

Online Test 1 – 10% (as Stream quiz)
This test is based on all the lecture and tutorial materials covered prior to the test (week1-week4). The best preparation for the test is by regularly going thru lectures, tutorials and completing set weekly tasks. To avoid random guessing, some test questions may have ***negative*** marks.
Prior to the test, a ***practice test*** will be available on the Stream. This will help you to get familiar with the online quiz environment.

Time
The test (in the form of a quiz on Stream) will open on **Friday, Aug 18th 4.00 pm** until **Saturday, Aug 19th 4.00 pm**. The test duration will be **40 minutes (tentative).**
Note: To use complete test duration of 40 minutes the latest you can open the quiz would be 4.20 pm on the Aug 19th.
However, we advise you to **not delay to the last minute** and this applies to all assessments.

Online Test 2 – 15% (on Stream) covering SQL and PL SQL (minor changes possible)
The test will assess your practical knowledge of SQL, and PL/SQL. Make sure you have enough proficiency in writing code.

Time
The test will be made available **(in week 10)** on the course Stream site from **Friday, Oct 6th 4.00 pm** to **Saturday, Oct 7th 4.00 pm**. The actual test duration will be **90 minutes (tentative).** You will need to answer the questions (i.e. write code) using a text box. A script file (your complete work) will also need to be submitted as part of the quiz. Further details will be provided closer to the test.

Note: The submission deadline will vary for each student depending on their start times.
Test Start Time: When you access/download the test (questions).
Test Stop time: When you submit and/or upload your work (answers to test questions).
Total Test duration: 1 hour and 45 minutes (90 minutes for the test itself **plus** generous 15 minutes given for downloading test / uploading the work - **tentative**)
Note: To use complete test duration the latest you can start the test would be 3.15 pm on the Oct 7th.

Assignment (Part A and Part B - 17.5% each) – 35%

The detailed assignment requirements will be published on the course Stream site closer to the date. However, please note that your assignment is to be done in groups of 3-4 (**no solo/pair** work will be accepted) and must be submitted in *two* parts as below:

Part A - due in MSB - Tuesday, 29th Aug 4.00 pm

Part B - due in week 12 - Tuesday, 17 Oct 4.00 pm

IN
CONFIDENCE

Both assignment parts require a soft copy (all work inside a compressed folder) submission on the upload link provided on the course Stream site. Only **one submission per group** is permitted as duplicate submissions are unnecessary and cause confusion. Please coordinate with your group who will be responsible for the submission.

The **turnaround time** for the assessments can be up to **three** weeks.

IMPORTANT: Any copying (including partial copying, or using Internet resources without acknowledging, etc.) will lead to a straight **ZERO** for the assignment for all ***collaborating*** parties. We do not have resources for an in-depth investigation (e.g. how much assignment component is copied, or who copied from whom, etc.) and hence kept the penalty simple. In addition, not adhering to submission requirements may also lead to a **ZERO** mark.

NZ time applies to all the indicated dates/times. **Please make a note of this and mark your calendars accordingly.**
